

I am writing in support of K-Love, locally at 100.7 in Utica, NY. The potential of LPFM broadcasting directly affects my ability to listen to this radio station and I speak against allowing such LPFM broadcasts. K-Love serves this community by providing positive, encouraging music, as well as giving its listeners contacts to people and ministries who can help them spiritually, psychologically, and physically. They provide information on places people in need can get food, shelter, and other important services. They also play a part in many community functions. If LPFM broadcasting was allowed and K-love was no longer accessible, then the community may no longer gain information about such services.

I trust you will consider this information as you determine whether or not LPFM broadcasts will be allowed to supercede traditional FM broadcasting.
